✅ Day 1 HTML + CSS Tasks (Beginner Level)

🧩 Task 1: Basic HTML Page

👉 Create a simple webpage with:

- One `<h1>` heading (your name)
- One `<p>` paragraph (about yourself)

🎨 Task 2: Add External CSS

👉 Create 2 files:

- `index.html`
- `style.css`

Use:

```
<link rel="stylesheet" href="style.css">
```

In CSS:

- Change background color
- Change text color

🔗 Task 3: Add a Link

👉 Add a clickable link:

- Text: "Go to Google"
- Opens https://www.google.com

🖼️ Task 4: Add Image

👉 Add any image using `<img>`:

- Use internet image or local image
- Set width = 200px

🧱 Task 5: Combine Everything

👉 Create a page with:

- Heading
- Paragraph
- Image
- Link
- CSS styling

🎯 Task 6: Personal Profile Page

👉 Create a small profile:

- Name (h1)
- Bio (p)
- Profile image
- Link to Instagram or LinkedIn

🌈 Task 7: Styling Practice

👉 In CSS:

- Change:
  - Background color
  - Font size
  - Text alignment (center)

🔥 Task 8: Multiple Headings

👉 Use:

- `<h1>` for title
- `<h2>` for section
- `<h3>` for sub-section

Example:

- About Me
- Hobbies
- Goals

📦 Task 9: Mini Blog Page

👉 Create:

- Title (h1)
- 2 paragraphs
- 1 image inside content
- “Read more” link

🧪 Task 10: Import CSS using @import

👉 Try this method inside `<style>`:

```
@import url("style.css");
```
